David, good to talk to you as well.

I will get right on this with my member companies and we will try our best to meet the Friday deadline.

If they have questions, I will get back to you.

Thanks,
Faye

Subject: data request

Faye,

It was good to touch base with you yesterday briefly on EPA's data needs for the draft Carbon Tetrachloride risk evaluation. EPA appreciates HSIA's efforts to provide important company specific data. As you know, there have been multiple communications regarding EPA's data requests over the last 2 years, which has resulted in data submissions to EPA. Although that information has been helpful, technical questions remain. In order to address EPA's outstanding data questions, and to have all the data in one submission to facilitate its use in the draft risk evaluation, EPA requests the following information for companies A and B, by this Friday, November 22, 2019 if at all practicable. (Please let me know if a conference call is needed to address any questions you may have regarding this submission. We would be pleased to speak with you and company reps as needed today.)

Data request for Company A:

- A single spreadsheet that contains all data points contained within the 2017 and 2018.
 - The data should be submitted with the meta data as was presented in the 2018 submission.

- The data should be accompanied by a cover letter that explains the data and will state that it is the full data set and supersedes previous submissions.

Data request for Company B:

- A single spreadsheet containing all 2017 and 2018 data.
 - Data points that are duplicates will not be removed but will be clearly noted as duplicates in the spreadsheet.
 - Data points that were invalid will not be removed but will be clearly noted as invalid and the reasons for invalidity will be noted.
 - A cover letter will be provided that explains the data and will state that this is the full data set and supersedes previous submissions.
 - The spreadsheet will contain the meta data as shown in the 2018 spreadsheet.

Thanks for your assistance.

David
